INDEX: VOLUME 31

AUTHORS AND SUBJECTS

Acar, William & Bissonnette, Victor. The social contract and the V-I-E theory: A linear programming formulation, 278–287.
Achenbach, Karl E.: see Martin W. Denker.
Adaptive system interaction 29–41
Agnew, Neil McK. & Brown, John L. Bounded rationality: Fallible decisions in unbounded decision space, 148–161.
Artificial intelligence 89–102.
Bargaining 65–81.
Benjamin, Yvonne N.: see Linda L. Viney
Bissonnette, Victor: see William Acar
Book Reviews:
Arbib, M. A. *In search of the person: Philosophical explorations in cognitive science* (Lee Ann Nickerson, rev.) 289–291.
Lopreato, Joseph, *Human nature and biocultural evolution* (David Winsch, rev.) 291–293.
Perper, Timothy. *Sex signals: The biology of love* (Ray Bixler, rev.) 219–220.
Pylyshyn, Zenon W. *Computation and cognition: Toward a foundation for cognitive science* (Gary W. Strong, rev. 286–289.
Bounded rationality 148–161.
Brown, John L.: see Neil McK. Agnew.
Clarke, Alex M.: see Linda L. Viney.
Culture 12–28
Cuzán, Alfred G. Fiscal policy, the military, and political stability in Iberoamerica. 226–238.
Decision making 148–161; 173–188; 226–228; 260–277.
Denker, Martin W., Achenbach, Karl E., & Keller, Donald M. Computer simulation of Freud's counterwill theory: Extension to elementary social behavior. 103–141.
Dilemma 254–259.
Domain skill 89–102
Dynamical systems 65–81.
Economic behavior 173–188.
Entropy, teleonomic 52–62.
Fallible Decisions 148–161
Fiscal policy 226–238.
Fishburn, Peter C. Empirical comparisons of voting procedures. 82–88.
Freud's counterwill theory 103–141.
Frischknecht, Federico. Informatic philosophy of behavioral sciences. 162–172.
Game theory 254–259.
Government 226–238.
Harris, Philip R. The influence of culture on space development. 12–28.
Health care systems 239–253.
Heuristics 260–277.
Hybrid intelligence 1–11.
Iberoamerica 226–238.
Ignorant monopolist 173–188
Informatic philosophy 162–172
Information processing 89–102; 162–172.
Katakis, Charis D. & Katakis, Dimitri F. Transference and transformation of teleonoic entropy. 52–62.
Katakis, Dimitri F.: see Charis D. Katakis.
Keller, Donald M.: see Martin W. Denker.
Kleiner, Brian H. Open systems planning: Its theory and practice. 189–204.
Learning processes 1–11.
Linde, Lena. What is domain skill? Frames in formation seeking. 89–102.
Medical decision making 260–277.
Military 226–238
Miller, James Grier. George Peter Murdock. 143–147.
Miller, James Grier. Theodore M. Newcomb. 223–225.
Muir, Donal E. A mathematical model of computer simulation of adaptive system interaction. 29–41.
Murdock, George Peter: see James Grier Miller.
Murnighan, J. Keith: see John A. Wagner III.
Need theory 205–218.
Newcomb, Theodore M.: see James Grier Miller
Open systems planning 189–204.
Organization 42–51; 162–172; 189–204; 239–253.
Political stability 226–238
Politser, Peter E. Heuristics, normative models, and the value of serial test patterns. 260–277.
Simulation 29–41; 103–141.
Social behavior 103–141
Social contract 278–285.
Space development and culture 12–28.
Takahashi, Nobuo. On the principle of unity of command: Application of a model and empirical research. 42–51.
Teleonomic entropy 52–62.
Tracy, Lane. Toward an improved need theory: In response to legitimate criticism. 205–218.
Transformation learning theory 1–11
Tutzauer, Frank. Bargaining as a dynamical system. 65–81.
Unbounded decision space 148–161
Unity of command 42–51.
Venda, Valery F. On transformation learning theory. 1–11.
V-I-E theory 278–287.
Viney, Linda L., Clarke, Alex M., and Benjamin, Yvonne N. A general systems approach to the patient, hospital staff, and community: Implications for health care services. 239–253.
Voting procedures 82–88.
Wagner, John A. III & J. Keith Murnighan. Nuts and dilemmas: A research note. 254–259.
Witt, Ulrich. How can complex economical behavior be investigated: The ignorant monopolist revisited. 173–188.

INDEX: VOLUME 31
